extensive range of basic and  
blended spices.

# 01

## LOW TEMPERATURE GRINDING

We use low temperature grinding (5-8°C) during size reduction of raw material to reduce the volatile loss. This method helps in retaining good colour, flavour, aroma and volatile oil of the final product.

## GRINDING PROCESS

**bhuvika**<sup>®</sup>

# 02

## UPGRADING SOON ON CRYOGENIC GRINDING FOR SEED SPICES

We further utilize cryogenic grinding for seed spices where the temperature is brought close to -195°C. This minimises the loss of aroma and volatile oils and thus retains the original aroma and the seed spices & thus retaining the original & flavour
